ENVIRONMENTAL POLICY

CAMPOSOL SA is a company dedicated to agriculture, the activities are related to the cultivation and production of fresh and frozen fruits for export; which, commits to

- Prevent environmental pollution by minimizing possible environmental impacts; through the timely identification of environmental aspects, the evaluation of risks and the establishment of preventive controls in production processes.
- Comply with the legal framework and regulations in force, the technical standards of voluntary organizations and other internal regulations.
- Establish and periodically review the objectives of the Environmental Management System.
- Implement and maintain a process of continuous improvement of the Environmental Management System and integrate it with the other management systems of CAMPOSOL.
- Promote greater environmental awareness among relevant stakeholders.
- Use resources rationally to ensure business sustainability.
- Manage solid waste in a responsible manner.

The present "Environmental Policy" is communicated to all our workers in all our offices; Likewise, it is available for consultation by interested parties, and is reviewed annually.
